DIRECTIONS FOR USE

Shake can before use. Best results are obtained if the pests are contacted directly. Treat in early morning or evening, when pests are in the nest.

APPLICATION

Wind should always be at the back of the user, and blowing towards the object being treated. For optimum performance, if treating overhead, align actuator spout with mark on valve cup. If treating down, align actuator spout to be directly opposite mark on valve cup. Hold container in an upright position to treat. Stand a safe distance, about 2 metres, from the nest and not directly underneath. Use a sweeping motion to saturate nests. To treat nests in ground, use the soil injector attachment and insert fully into mound, then spray for about 5 seconds.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL.

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN

DO NOT spray directly on humans or pets.

DO NOT stand directly underneath the spray site to ensure insects and spray do not fall onto the skin or clothing.

BEWARE: Deliberately sniffing or inhaling concentrated spray can be harmful or fatal.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Dangerous to bees. Dangerous to fish. DO NOT contaminate streams, rivers or waterways with the chemical or used containers.

STORAGE AND DISPOSAL

FLAMMABLE. Do not store or use near flame or fire. Keep in a cool place out of the sun, and out of the reach of children. Do not incinerate or puncture this can, even when empty. Recycle empty cans if a facility is available or place used can in household rubbish.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126.

SAFETY DIRECTIONS

May irritate the eyes. Avoid contact with eyes and skin. Wash hands after use.

MSDS

Additional information is listed in the Material Safety Data Sheet available from BASF or visit our website at www.termidor.com.au

PROPELLANT

Carbon dioxide
